

Obsidian SCI Equity Fund

Minimum Disclosure Document

As of 31/05/2026

OBSIDIAN CAPITAL

MDD Issue Date: 15/06/2026

Fund Objective

The objective of this fund is to provide above average growth in capital over the medium to long term. Income will be of secondary importance. The risk associated with this portfolio shall be the same as the risk associated with SA equities as an asset class. Volatility of capital can occur over the short term.

Fund Strategy

The fund shall invest in assets in liquid form and in shares across all sectors of the JSE Securities Exchange of South Africa. The fund shall be allowed to invest in listed and unlisted financial instruments (derivatives) for efficient portfolio management and may hold up to 45% in offshore investments. The fund will also be allowed to invest in offshore exchange traded funds and exchange traded notes as allowed by the Act from time to time in order to achieve its investment objective. The portfolio may also invest in participatory interests (units) of underlying unit trust portfolios.

Additional Information

All reasonable steps have been taken to ensure the information on this minimum disclosure document is accurate. The information to follow does not constitute financial advice as contemplated in terms of the Financial Advisory and Intermediary Services Act. Use or rely on this information at your own risk. Independent professional financial advice should always be sought before making an investment decision. The Sanlam Group is a full member of the Association for Savings and Investment SA. Collective investment schemes are generally medium to long-term investments. Please note that past performances are not necessarily a guide to future performances, and that the value of investments / units / unit trusts may go down as well as up. A schedule of fees and charges and maximum commissions is available from the Manager, Sanlam Collective Investments (RF) Pty Ltd, a registered and approved Manager in Collective Investment Schemes in Securities. Additional information of the proposed investment including brochures, application forms and annual or quarterly reports can be obtained from the Manager free of charge. Collective investments are traded at ruling prices and can engage in borrowing and scrip lending. Collective investments are calculated on a net asset value basis which is the total market value of all assets in the portfolio including any income accruals and less any deductible expenses such as audit fees, brokerage and service fees. Actual investment performance of the portfolio and the investor will differ depending on the initial fees applicable, the actual investment date, the date of reinvestment of income as well as dividend withholding tax. Forward pricing is used. The Manager does not provide any guarantee either with respect to the capital or the return of a portfolio. The performance of the portfolio depends on the underlying assets and variable market factors. The fund manager may borrow up to 10% of the market value of the portfolio to bridge insufficient liquidity. Performance is based on NAV to NAV calculations with income reinvestments done on the ex-div date. Lump sum investment performances are quoted. Source: Money Mate. All the portfolio options presented are approved collective investment schemes in terms of Collective Investment Schemes Control Act, No 45 of 2002 ("CISCA"). The portfolio may invest in participatory interests of other unit trust portfolios. These underlying funds levy their own fees, and may result in a higher fee structure for our portfolio. The fund may from time to time invest in foreign countries and therefore it may have risks regarding liquidity, the repatriation of funds, political and macroeconomic situations, foreign exchange, tax, settlement, and the availability of information. The Manager has the right to close any portfolios to new investors to manage them more efficiently in accordance with their mandates. *Actively-managed funds charge a Manager Annual Fee. This annual charge is expressed as a percentage which is accrued on a daily basis and is debited at regular intervals throughout the year (usually monthly). The annual management charge differs between Investment Funds and also within each Investment Fund. In many instances, the companies who distribute investment funds to retail investors receive rebates from the fund providers on an ongoing basis. Rebates are paid from the Manager Annual Fee and are not an additional fee paid by the investor. Rebates can vary from around 10%-60% of the Manager Annual Fee.* Management of this portfolio is outsourced to Obsidian Capital (Pty) Ltd, (FSP) Licence No. 32444, an Authorised Financial Services Provider under the Financial Advisory and Intermediary Services Act, 2002. The Manager retains full legal responsibility for the co-named portfolio. Effective 1 April 2026, the administration fee applicable to retail clients with an investment balance below R50,000 will increase from R23 to R57.50 (VAT inclusive). Clients with an increase recurring monthly debit order will not be levied this fee.

Glossary Terms

Annualised total returns

An annualised return is the weighted average compound growth rate over the period measured.

Capital preservation

This is an investment strategy where the primary goal is to preserve (protect) capital and prevent losses in a portfolio. Preserving capital is a priority for retirees and those approaching retirement, since they may be relying on their investments to generate income to cover their living expenses, and have limited time to recoup losses if markets experience a downturn.

Distributions

The income that is generated from an investment and given to investors through monthly or quarterly distribution pay outs.

Equities

An equity or share represents an institution/individual's ownership in a listed company and is the vehicle through which they are able to "share" in the profits made by that company. As the company grows, and the expectation of improved profits increases, the market price of the share will increase and this translates into a capital gain for the shareholder. Similarly, negative sentiment about the company will result in the share price falling. Shares/equities are usually considered to have the potential for the highest return of all the investment classes, but with a higher level of risk i.e. share investments have the most volatile returns over the short term. An investment in this type of asset should be viewed with a 7 to 10 year horizon.

LISP (Linked Investment Service Provider)

A Linked Investment Service Provider is a financial institution which packages, distributes and administers a broad range of unit trust based investments. Any investment made through these products gives an investor a single point of entry into a selection of different investments.

Total Expense Ratio (TER)

Is the percentage value of the Financial Product that was incurred as expenses relating to the administration of the Financial Product. A higher TER does not necessarily imply a poor return, nor does a low TER imply a good return. The current TER may not necessarily be an accurate indication of future TER's.

Transaction Cost (TC)

Is the percentage value of the Financial Product that was incurred as costs relating to the buying and selling of the assets underlying the Financial Product. Transaction Costs are a necessary cost in administering the Financial Product and impacts Financial Product returns. It should not be considered in isolation as returns may be impacted by many other factors over time including market returns, the type of Financial Product, the investment decisions of the investment manager and the TER.

Total Investment Charges (TER + TC)

Is the total percentage value of the Financial Product that was incurred as costs relating to the investment of the Financial Product.

Aggressive risk profile: >10 years (long term)

You can afford to take on a higher level of risk (ie, will have a greater exposure to equities in your portfolio) because of your investment time horizon or your appetite for risk. You know that in taking the risk, you need to be patient if you want to achieve the results. So you are willing to invest for the long-term and are prepared to tolerate some volatility in the short term, in anticipation of the higher returns you expect to receive in five years or beyond.
